

ROALD DAHL ON FILM

My Dream Factory

by Nina Dmitrovic of Takovski Ustanak school

Have you ever wished you could be someone else for a day? See the world with a different pair of eyes, know different people, live a different life? Until now, you could only do it through books, but now you can actually become a different character thanks to the latest scientific breakthrough.

How does it work?

Nina, the creator: You see, what we do here is gather a whole variety of personality traits, donated by people from all around the world, and combine them into truly fascinating characters. Our team spends a lot of time working on making the characters and their stories interesting so the day spent as them would be as pleasurable as possible.

Can people make the characters themselves?

Nina, the creator: Yes, they can, but the price is just a little bit higher. When you want to spend a day as one of the characters we made it's only 69\$, but if you want to make your own it's 69.00\$.

How do they become those characters?

Nina, the creator: It's a secret 😊

We'd really like to know.

Mind your own business. 🤔

All in all, this factory is something that the world has been waiting for. It offers you different view of the world and it can also be used for educational purposes. No wonder this has been all over the news for the last few months.

TOURS OF THE FACTORY WILL BE HELD ON SATURDAY AT 8 PM
