

ROALD DAHL ON FILM

My Dream Factory

by Ilija Kostic of Takovski Ustanak school

What would be my dream factory? Hmm, let me think... Uhh, I don't have time because I have to go to school- that's it, it would be a factory that makes time. Everyone always needs more time. Well I've got to go now I am in a hurry, follow me and I will tell you about the time factory.

Well the time factory would make time, I am not really sure how, but it will, it would probably be like a time in a bottle you just drink it and time stops for a few minutes. Or it could be a watch and you just turn the hands of a watch counterclockwise and the time goes back. But that wouldn't really work because it would make time go back for everyone. So the first idea works. It is the time factory which will produce time in bottles. Oh no, it's already two o'clock I am going to be late for my lessons. I could really use a ten-minute bottle of time so I can tell you everything but I have to go so see you around bye.

That was an interesting question. Uuuhh I am late.

-Hello I am sorry I am late.

- It is fine. Sit down you haven't missed much. We have just been talking about a scientist who tried to travel back to the past using a clock that he made.

-Ok, professor, and what do you think about time in a bottle like a potion?

- Hmm, an interesting idea.
